Research Note from Numis Securities Limited

Baker Steel Resources Trust - Positioned for Recovery

A new research note on Baker Steel Resources Trust ("BSRT") has been released by Numis Securities Limited. The research note addresses BSRT's active investment management style, the current holdings in the portfolio and the outlook for the company.

Recovery is underway in the mining sector, as investor sentiment towards natural resources equities improves. BSRT concentrates on capital appreciation through identifying and investing in attractively valued early stage (pre-IPO) and specialist listed opportunities. Our highly experienced and proven investment team continues to identify attractive opportunities, and the portfolio is well-positioned to benefit from a recovery phase for the natural resources sector.

To request a copy of the research note please contact Numis Securities' research team:
